MODEL NUMBER: PDU3EVN10L2130B

10kW 3-phase PDU with multifunction touchscreen LCD distributes AC power in an IT environment and remotely monitors load levels to prevent potentially costly overloads.

Description

The PDU3EVN10L2130B 10kW 3-Phase Monitored PDU provides real-time remote monitoring of voltage, frequency and load levels via built-in network connection. By reducing the frequency of on-site visits, these advanced remote capabilities can save you money and reduce downtime.

A color touchscreen LCD lets you toggle between menus to monitor input current level per phase and output current per load bank with $\pm 1\%$ billing-grade accuracy, environmental sensor data and network information. It also generates a unique QR code to allow access to the PDU through a mobile device.

Recommended for your IT or industrial application, the monitored PDU features 42 C13 and 6 C19 receptacles with included plug-lock insert sleeves, the monitored PDU features 42 C13 and 6 C19 receptacles with included plug-lock insert sleeves to prevent cables from becoming accidentally disconnected. A 10-foot cord with NEMA L21-30P input plug connects the 3-phase PDU to a compatible AC power source, generator or protected UPS.

The built-in Java-free HTML5-based LX Platform network interface enables full remote access for PDU status monitoring and email notifications via secure web browser, SNMP, telnet or SSH. It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Optional EnviroSense2 modules (sold separately) provide a variety of environmental monitoring capabilities.
