Description

The SMART1000RM2U SmartPro 120V 1kVA 800W Line-Interactive Sine Wave UPS provides battery backup and AC power protection against blackouts, brownouts, power surges and line noise that can damage electronics or destroy data. Ideal for backing up servers and network storage devices, the SMART1000RM2U switches to 1kVA/800W battery mode in milliseconds to keep your connected equipment running long enough to save files and shut down safely with no data loss.

Four of the six NEMA 5-15R outlets may be switched off remotely to reboot equipment or shed nonessential loads to maximize battery backup time for mission-critical equipment. The internal battery provides 15 minutes of support at half load(400W) and 5.3 minutes at full load(800W). A front-panel LCD screen lets you monitor important data, such as load level, power factor, voltage, battery charge and estimated runtimes.

Automatic voltage regulation(AVR) maintains 120V nominal output over an input range of 83V to 147V without using battery power. EMI/RFI noise filtering improves your equipment's performance and prevents damage. A 570-joule surge suppression rating protects your equipment from harmful power surges. With Tripp Lite's included PowerAlert® software, the SMART1000RM2U enables safe unattended system shutdown and file saves in case of a prolonged power failure. Adding an optional Network Management Card options, such as Tripp Lite's [SNMPWEBCARD](#), permits remote management of the UPS, including reboots and activity logs.
