

VISTA TOUCH: Flow

A revolution in panel meters, the Vista Touch Flow touch screen flow rate indicator and totalizer has been designed for use with a wide range of industrial flow sensors.

The Vista Touch Flow Indicator by Trumeter is an advanced panel meter designed for diverse industrial applications. This innovative device integrates seamlessly with a wide range of industrial flow sensors, serving as a flow monitor, rate indicator, and totalizer.

Key Features

- **HD Touch Screen:** The device features a vibrant, full-color 70mm x 70mm [2.76" x 2.76"] graphical display with a fully configurable touchscreen interface and multiple pre-loaded gauge options.
- **IoT Ready with Trumeter Cloud Integration:** Includes a free subscription to the Trumeter Cloud for built-in remote monitoring, allowing for real-time data access and management.
- **High Accuracy:** Offers 1% accuracy across the input range, ensuring precise measurements.
- **Proven Communication Protocols:** Supports industry-standard Modbus RTU (RS485) and TCP/IP (Ethernet) for reliable data transmission.
- **User-Friendly Configuration:** Enables easy loading and saving of configuration data via a USB flash drive.
- **Standard Mounting:** Fits industry-standard ¼ DIN mounting, ensuring compatibility with existing systems.

The Vista Touch Flow Indicator is designed to enhance efficiency and monitoring capabilities in industrial environments, making it a versatile and indispensable tool for modern industrial operations.

Part Numbers

APM-VT-FLOW-HV – Vista Flow Meter 100-277VAC
APM-VT-FLOW-LV – Vista Flow Meter 12-24VAC/DC
