

# 15T / 15H Encoder

## Hollow Bore Performance Encoder

The Model 15T or 15H offers a high performance feedback solution in a low profile package. Unlike modular or kit encoders, the Model 15 utilizes an integral bearing set, and an innovative flexible mounting system which is much more tolerant to axial misalignment or radial shaft run-out. The slotted flex mounts provide 20 or 30 degrees of rotational adjustment for commutation or index pulse timing.

Installation is quick and easy. For brushless servo motor applications, three 120° electrical phase tracks can provide up to 12 pole commutation feedback. The optional 100°C and 120°C temperature options allow servo motors to operate at higher power outputs and duty cycles. The Model 15 provides stable and reliable operation and is an excellent replacement for other manufacturers modular encoders where a high performance solution is desired.

### Key Features

- High Performance Economical Encoder
- Low Profile 1.0" (25.4 mm) Height and 1.5" (38 mm) Diameter
- Thru-Bore (sizes up to 0.375" or 10 mm)
- Simple, Innovative Flex Mounting System (Global Mounting Standards)
- Up To 12 Pole Commutation Optional (for brushless motor control)

### Applications

- Servo motor control
- Robotics
- Specialist assembly machines
- Digital plotters
- High power motors

### NOTES:

<sup>1</sup> Contact Customer Service for additional options not shown.

<sup>2</sup> Not available in all configurations, and not available with V1 Input Voltage. Contact Customer Service for availability.

<sup>3</sup> Contact Customer Service for non-standard index gating or phase relationship options.

<sup>4</sup> For non-standard English cable lengths enter 'F' plus cable length expressed in feet. Example: F06 = 6 feet of cable. Frequency above 300 kHz standard cable lengths only.

<sup>5</sup> For non-standard metric cable lengths enter 'M' plus cable length expressed in meters. Example: M06 = 6 meters of cable.

<sup>6</sup> Please refer to Technical Bulletin TB100: When to Choose the CE Option

<sup>7</sup> This mount requires button head screws and a modified Hex wrench. Order appropriate Installation Kit listed under Specifications.

<sup>8</sup> Not available with commutation. 5-pin not available with Line Driver (HV, OD, LO) outputs. Additional cable lengths available. Please consult Customer Service.

<sup>9</sup> With Input Voltage above 16 VDC, operating temperature is limited to 85°C.

<sup>10</sup> Only available with 5 VDC Input Voltage.
