

Magnetically Actuated Linear Position Sensor WIM100-Q25L-LI-EXI-H1141

TURCK
works

Industrial
Automation

- ATEX category II 2 G, Ex Zone 1
- ATEX category II 2 D, Ex Zone 21
- Rectangular, aluminium / plastic
- Many mounting possibilities
- Immune to external magnetic fields
- Extremely short blind zones
- 2-wire, 14...30 VDC
- Analog output
- 4 ... 20 mA
- Male connector, M12 x 1

Wiring Diagram

Functional principle

Linear position sensors operate on the Hall principle and accomplish simple control tasks. They provide an output signal proportional to the actuating magnet. The polarity of the magnet has no effect on the output signal. The outstanding features of these robust sensors are excellent repeatability, resolution and linearity, excellent electromagnetic capability and a broad temperature range.

Characteristic

Type designation	WIM100-Q25L-LI-EXI-H1141
Ident-No.	1536642
Measuring range [A...B]	100 mm
Resolution	0.1 mm/10 bit
Repeatability	≤ 0.1% of measuring range IA - BI ≤ depending on positioning element
Linearity deviation	≤ 1 %
Temperature drift	≤ ± 0.03 % / K
Ambient temperature	-25...+65 °C For explosion hazardous areas see instruction leaflet
Operating voltage	14...30 VDC an der Anschlussstelle des Sensors
Residual ripple	≤ 10 % U _s
Isolation test voltage	≤ 0.5 kV
Short-circuit protection	yes
Wire breakage/Reverse polarity protection	yes/ Complete
Output function	4-pin, Analog output
Current output	4...20 mA
Load resistance current output	≤ [(U _s - 14 V) / 20 mA] kΩ
Sample rate	200 Hz
Approval acc. to	KEMA 03 ATEX 1122 X Issue no. 2
Design	Rectangular, Q25L
Dimensions	141 x 35 x 25 mm
Housing material	Aluminium
Active area material	Plastic, PA6-GF30
Electrical connection	Connector, M12 x 1
Vibration resistance	55 Hz (1 mm)
Shock resistance	30 g (11 ms)
Protection class	IP67
MTTF	131 years
Packaging unit	1

Magnetically Actuated Linear Position Sensor WIM100-Q25L-LI-EXI-H1141

Mounting instructions/Description

Numerous accessories allow the sensor to be mounted in various positions. Opposite to the active face, the sensor housing features a mounting groove for which sliding blocks are available. The lateral slot profiles can be used for mounting, too.

When used with an external positioning element, the sensor can either be mounted with the active face located opposite or laterally to the mounting surface. Drilling slots guarantee highest flexibility for fine adjustment.

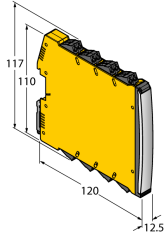

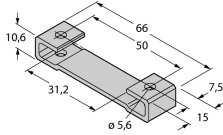

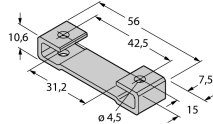

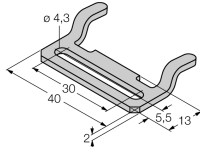

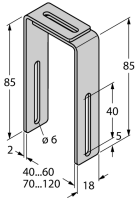

The mounting accessories for linear position sensors can be adjusted to the respective cylinder sizes. The stainless steel accessories guarantee safe and robust mounting as well as highest flexibility. .

Accessories

Type code	Ident-No.	Description	
IMX12-AI01-2I-2IU-H0 /24VDC	7580305	Isolating transducer; 2-channel; power supply of passive 2-wire isolating transducers with HART® communication as well as connection of active 2-wire transmitters, SIL2 acc. to IEC61508; Ex-proof version; selectable with either current source/sink or voltage output; removable screw terminals; 24 VDC power supply	
M1-Q25L	6901045	Mounting foot for linear position sensor Q25L; aluminium; 2 pcs. per bag	
M2-Q25L	6901046	Mounting foot for linear position sensor Q25L; aluminium; 2 pcs. per bag	
MB1-Q25	6901026	Mounting clip for linear position sensor Q25L; material Stainless steel; 2 pcs. per bag	
MB2.1-Q25	6901027	Mounting bracket for linear position sensors Q25L; mounting on pneumatic cylinders (40...60mm); material: Stainless steel; 4 pcs. per bag

Operating manual

Intended use

This device fulfills the directive 2014/34/EC and is suited for use in explosion hazardous areas according to EN60079-0:2012 + A11 -11:2012. In order to ensure correct operation to the intended purpose it is required to observe the national regulations and directives.

For use in explosion hazardous areas conform to classification

II 2 G and II 2 D (Group II, Category 2 G, electrical equipment for gaseous atmospheres and category 2 D, electrical equipment for dust atmospheres)

Marking (see device or technical data sheet)

Ⓔ II 2 G Ex ia IIC T6 Gb and Ⓔ II 2 D Ex ia IIIC T85 °C Db acc. to EN 60079-0, -11

Local admissible ambient temperature

-25...+66 °C

Installation/Commissioning

These devices may only be installed, connected and operated by trained and qualified staff. Qualified staff must have knowledge of protection classes, directives and regulations concerning electrical equipment designed for use in explosion hazardous areas. Please verify that the classification and the marking on the device comply with the actual application conditions.

This device is only suited for connection to approved Exi circuits according to EN 60079-0 and EN 60079-11. Please observe the maximum admissible electrical values.

After connection to other circuits the sensor may no longer be used in Exi installations. When interconnected to (associated) electrical equipment, it is required to perform the "Proof of intrinsic safety" (EN60079-14).

Installation and mounting instructions

Avoid static charging of cables and plastic devices. Please only clean the device with a damp cloth. Do not install the device in a dust flow and avoid build-up of dust deposits on the device.

If the devices and the cable could be subject to mechanical damage, they must be protected accordingly. They must also be shielded against strong electro-magnetic fields.

The pin configuration and the electrical specifications can be taken from the device marking or the technical data sheet.

In order to avoid contamination of the device, please remove possible blanking plugs of the cable glands or connectors only shortly before inserting the cable or opening the cable socket.

Special conditions for safe operation

The device must be protected against any kind of mechanical damage, avoid static charging.

Service/Maintenance

Repairs are not possible. The approval expires if the device is repaired or modified by a person other than the manufacturer. The most important data from the approval are listed.
