

## Convenient pushbutton preset entry . . . in a space-saving package

Specific Models

RECOGNIZED
CERTIFIED

Power Consumption: 6 watts count coil, 12 watts reset coil
Output Actuation: The internal SPDT switch actuates on the power-off half of the predetermining count cycle; the switch will remain in its position, and the count will stay at zero until the counter is reset
Number of Figures: 5 [ 0.160 in . high $\times 0.075 \mathrm{in}$. wide ( $4.1 \times 1.9 \mathrm{~mm}$ )]
Reset: Manual pushbutton or electric reset, see models
Preset: Manual pushbutton for each digit; reset button must be fully depressed and latched to permit setting
Connections: Plug-in connectors
Net Weight: 5 oz. (142g)

|  | Supply | Count <br> Coil <br> Resistance | Electric <br> Reset <br> Coil <br> Resistance | Electric <br> Reset |
| :--- | :---: | :---: | :---: | :---: |
| Model No. | Voltage | RO |  |  |
| $\mathbf{0 7 4 4 1 9 5 - 2 1 1}$ | 115 VAC | $1500 \Omega$ | - | NO |
| $\mathbf{0 7 4 4 1 9 5 - 2 2 1}$ | 115 VAC | $1500 \Omega$ | $716 \Omega$ | YES |
| $\mathbf{0 7 4 4 1 9 5 - 2 2 6}$ | 24 VDC | $100 \Omega$ | $77 \Omega$ | YES |

Ideal for printing presses, molding machines, and other industrial equipment.
When panel area is limited, and functional simplicity is a key concern, the Series 7441 may be the best predetermining counter for the job. It counts down from a user entered preset value. Upon reaching zero, an output switch is actuated. Manual or remote reset restores the switch and preset value to their original condition.

- Reliable operation at counting speeds to 1500/minute
- Underwriters Laboratories Recognized
- 5 figure count display and preset capability
- Models for AC and DC operation

■ Compact size - $2^{\prime \prime}$ wide ( 50.8 mm ), $1^{\prime \prime}$ high ( 25.4 mm )

- Rugged, high impact plastic and stainless steel case

■ Unique preset interlock prevents accidental change

- Form C (SPDT) output contacts rated at 1 amp.
- Models available with electric remote-reset
- Convenient plug-in connector

Setting a preset value into the Series 7441 is direct and easy, yet secured from unintentional change. Just press the reset button to its special latched position, then use the five digit-buttons to set the desired number on the display. If left latched, the reset button will automatically return to its normal position when the first count signal is received.

## For two presets, see Series C346

For low cost electronic, see Series A103

## SPECIFICATIONS

Count Speed: 1500 cpm on DC, 1200 cpm on AC
Operating Temperature Range: $+32^{\circ} \mathrm{F}$ to $+120^{\circ} \mathrm{F}\left(0\right.$ to $\left.+49^{\circ} \mathrm{C}\right)$
Maximum on Time: With a $50 \%$ duty cycle, maximum permissible ON time is 5 minutes
Count Pulse Timing: 20 milliseconds minimum on- or off-time for DC operation, 25 milliseconds minimum on-time for AC operation
Electric Reset Timing: 250 milliseconds minimum; 30 seconds maximum; allow 500 milliseconds after removal of reset pulse before applying count pulse
Supply Voltage: Standard voltages are 115 VAC, $50 / 60 \mathrm{~Hz}$; 24 VDC; allowable voltage variation is $\pm 10 \%$ or 10 volts, whichever is less

Typical Applications:
