PWR SERIES

3-Wire Device, User-Selectable Output

PWR

Armor cable

Armor cable or conduit connector minimizes the need for field customization

Zero calibration

Pushbutton zero calibration – no trim pots to adjust…maintain accuracy and prevent callbacks with automatic zero calibration

Lower costs

Remote probes reduce need for plumbing or bypass assemblies… lower costs and reduced labor for installation

Switch-selectable

Switch-selectable pressure ranges…fewer models to order and stock

The PWR Series remote wet media pressure transducers allow remote pressure sensing capability using existing plumbing runs. With no need to run plumbing lines all the way to the transducer, the installation time and cost is greatly reduced. Select either armored (6 ft.) or shielded (10 or 20 ft.) cable, depending on the application.

APPLICATIONS

- Monitoring and controlling pump differential pressure
- Chiller/boiler differential pressure drop
- CW/HW system differential pressure

CE†

*VFD systems and system wiring generate fields that can disrupt electrical devices. Ensure that these fields are minimized and are not affecting the sensor or sensor wiring.
**F.S. is defined as full span of selected range.
***Accuracy combines linearity, hysteresis, and repeatability.
† The CE mark indicates RoHS2 compliance. Please refer to the CE Declaration of Conformity for additional details.

* Select operational range according to maximum gauge pressure, NOT differential pressure.
Example: High gauge pressure=90 psig, Select 100 psig model (04).
** Standard cable available only in 10 ft and 20 ft lengths.
*** Armored cable available only in 6 ft length.
Note: Extension of total cable length greater than 20 feet may result in reduced accuracy.
