

Phase Control SCR, 10 A

TO-220AB

DESCRIPTION/FEATURES

The 10TTS08PbF High Voltage Series of silicon controlled rectifiers are specifically designed for medium power switching and phase control applications. The glass passivation technology used has reliable operation up to 125 °C junction temperature.

Typical applications are in input rectification and crow-bar (soft start) and these products are designed to be used with Vishay HPP input diodes, switches and output rectifiers which are available in identical package outlines.

Also available in SMD-220 package (series 10TTS08SPbF).

This product has been designed and qualified for industrial level and lead (Pb)-free ("PbF" suffix).
