

MINELA

OUTSTANDING PERFORMANCE AND CONTROL

The innovative Minela LED Task Luminaire brings lighting quality, energy efficiency and design innovation at a whole new level. The design is a combination – Pure Function and Aesthetics in One. Minela shines with true innovation, utilizing a high-power multi-chip LED strip design that operates with only 5 watts of power. It illuminates the surface uniformly across a wide area with invigorating light color, while eliminating shadows.

A UNIQUE SHAPE

STANDS OUT WITH CLEAR LINES

MINELA can be seamlessly integrated into any style. The high contrast interaction between chiseled and elliptic shapes gives the MINELA a unique appearance, which is underscored by the high-quality materials: the head, support arm and stand are made of powder-coated aluminum. The metal surfaces support the efficient distribution of heat produced by the light source.

The two delicate grooves on the top and bottom of the head are a very special design detail. They visually continue the line of the pivot arm and provide an interesting accent.

The illuminated push button for on/off and dimming functions is activated with a light touch. When the luminaire is switched off, the push button serves as an orienting light.

A COOL HEAD

HAS MANY ADVANTAGES

MINELA is equipped with a high power multichip LED in an innovative strip design, operating on only 5 watts. A special feature is the well-engineered thermal management designed to maximize control and comfort. By using premium electronic components the heat of the high-performance LED is quickly dissipated. The MINELA also has a unique shut-off feature – shutting off after 14 hours of uninterrupted operation. The benefits are obvious: higher energy efficiency, longer service life and less heat.

The innovative strip design of the LED enables wide-spread lighting and uniform illumination of at least 23.5 x 23.5 in. (600 x 600 mm.)

FAR REACHING

A LONG ARM OFFERS TRUE FLEXIBILITY

The long extension arm ensures maximum flexibility when it comes to the placement of the MINELA. The luminaire can be easily set up or attached to the desk, work, or reading surfaces, either to the left or the right.

MINELA is available with a mobile table base or a table clamp.

FLEXIBLE AT EVERY TURN

LIGHTING IS A MATTER OF CONTROL.

MINELA is equipped with three articulated joints and can be adjusted to any individual lighting requirement.

The gas pressured spring relieves the joints of the weight of the luminaire. As a result, MINELA is very easy to position. The self-locking joints automatically secure the selected position – and the cumbersome opening and closing of thumb screws is a thing of the past. The head can be moved into any desired position in several dimensions – great for preventing reflections on shiny surfaces. Additionally, both symmetrical and asymmetrical light distribution is possible.

TECHNICAL DATA

POWER SUPPLY	100-240 V, 50/60 HZ
LAMPING	7W LED
POWER CABLE	7.5 ft with transformer and US plug
MATERIAL BODY/SURFACE	Aluminum, powder-coated
WEIGHT	approx. 2 lb
POWER CONSUMPTION	8W
OPERATION	Touch sensor
ARM BALANCE	Gas pressure spring
PROTECTION CLASS	II
OPERATING DEVICE	Plug-in Transformer
SPECIAL FEATURE	Dimmable
WARRANTY	5 year
MOUNTING OPTIONS	Table base (included) table clamp (optional)

MODEL	COLOR	COLOR TEMP.	PART NUMBER
MINELA	White	2900K	112883039 - 0049370
MINELA	White	3500K	112883000 - 00532576
MINELA	Silver	3500K	112883000 - 00532579
MINELA	White	5000K	112883030 - 00494351
MINELA	Silver	5000K	112883032 - 00494366
TABLE BASE	Black	na	1LL00500C
TABLE CLAMP	Black	na	1LL00100C - 00050472
