
LINURA.EDGE

LED LINEAR LUMINAIRE / ENCLOSURE LIGHT

Waldmann's newest LED industrial surface-mounted luminaire is designed for applications on or inside a machine cabinet or enclosure. With its narrow profile and a tilt radius of $\pm 60^\circ$, LINURA.edge is ideal for those small spaces where light is needed, but may be too small to accommodate most light fixtures. The M12 connection makes it extremely simple to connect and operate. Great aesthetics with high functionality- that's LINURA.edge from Waldmann.

Performance - Quality smooth, even light for better performance:

With the latest LED technology ($>170 \text{ lm / W}$) and a PMMA acrylic lens to distribute light with optimum effect, the desired light level is easy to achieve with smaller or fewer fixtures.

Quality - Robust housing, less downtime:

A strong aluminum profile and a lens made of PMMA acrylic provide strength and resistance from the surrounding environment. The special sealing makes LINURA.edge resistant to high ambient temperatures, liquids and dust (IP54).

Compact design - Slim, streamlined, less space required:

Small dimensions (measuring less than an inch in diameter) and 10 variable lengths based on a 5.5" grid, make it easier than ever to get light where you need it, where bright lighting is essential.

Connection - More connection options, less wiring:

LINURA.edge has an integrated M12 connection and can connect with other fixtures. Control is performed via digital interfaces, greatly reducing the amount of wiring needed. Brackets (included) allow for an adjustment range of $\pm 60^\circ$.

LINURA.edge RBG - Signaling as clear as possible

Seven adjustable light colors for status messages and design effects. Digital input for powerless switching. Thru-wiring operation with white lights possible (common actuation of both lights via one single feed line).

LED linear luminaire - LINURA.edge

Specifications

Light source:	LED
Beam angle:	90°
Glare-free technology:	direct beam with diffuser lens
Housing material:	anodized aluminum
Lens material:	PMMA plexiglass
Ambient temperature:	104° F
LED service life:	> 60,000 hours [L70 B50]
Protection rating:	IP54
Connection:	M12 plug connector, A-coded
Voltage :	22-26 VDC
Certification:	CE, cETLus
Accessories:	M12 connector, cable, and operating device

ACCESSORIES

Part #	Description
US0009001	CONNECTOR/CABLE: 16' cord with 4-pin, A-coded for 24V, M12 connector, straight
US0009011	CONNECTOR/CABLE: 16' cord with 4-pin, A-coded for 24V, M12 connector, angled
US0009101	CONNECTOR/CABLE FOR RGB: 16' cord with 5-pin, A-coded for 24V, M12 connector, straight
US0009111	CONNECTOR/CABLE FOR RGB: 16' cord with 5-pin, A-coded for 24V, M12 connector, angled
336884M10	CONNECTOR: M12 Connector, A-coded, 4 pin, male (for 24V)
209585029	OPERATING DEVICE: Max. Wattage = 20W to run at 100-277V, 50/60Hz
209585030	OPERATING DEVICE: Max. Wattage = 50W to run at 120V, 50/60Hz
209585032	OPERATING DEVICE: Max. Wattage = 96W to run at 120-277V, 50/60Hz
