

## SIN – Safety switch with separated actuator and guard locking

### Applications

- Personnel protection on machines with dangerous machine parts which move after switching off
- Locking of a machine or an automatic process when the guard is open
- Position monitoring of guard and guard locking

### Features

- Suitable for locking devices in accordance with EN 14119
- Flexible use with 4 horizontal or 4 vertical actuating directions
- Integrated protection against simple bypassing
- Long service life thanks to dust- and water-proof housing and a broad operating temperature range of up to 70°C
- Locking force 1,500 N

### Function

The mechanical safety switches in the SIN series are suitable for the secure locking (guard locking) of safety doors until a hazardous machine process has ended.

The safety switches have two independent contact blocks which reflect the position of the actuator on the one hand and the position of the guard locking on the other.

The release of the entry or a shutdown of the machine in case of danger is done by evaluating the contact blocks by a suitable basic device **safe** RELAY or through the **samos**® or **samos**®PRO safety systems.

### Spring-actuated locking (SIN 1xxx)

The safety switch on the guard is locked automatically when the actuator reaches its end position.

The guard is unlocked by applying a current to the internal electromagnets in the safety switch.

### Magnet-actuated locking (SIN 2xxx)

The safety switch on the guard is locked when the actuator reaches its end position by applying a current to the internal electromagnet.

When the current to the internal electromagnet is switched off, the guard locking is released and the guard can be opened.

### Versatile installation

Thanks to the adjustable actuator head and the large selection of actuators, the safety switch can be used to implement guard locking devices for all applications in machine construction.

Universal use through 8 different actuating directions and 5 different actuators:

# SIN – Safety switch with separated actuator and guard locking

## Technical data

<b>Function</b>	
according EN 14119	Safety switch with separated actuator and guard locking
<b>Power supply circuit</b>	
Rated voltage	24 V AC/DC, 110/230 V AC
Continuous output	4.4 VA (SIN 12xx: 8 VA)
<b>Output circuit</b>	
Contact load of conv. thermal current $I_{th}$	5 A
Application category	AC-15: $U_e$ 230V, $I_e$ 2,5 A
Mechanical life	1 x 10 <sup>6</sup> switching cycles (max. 600 switching cyclesh)
Short-circuit protection	lead fuse 4 A class gL
<b>Mechanical data</b>	
Guard locking force	1500 Nm
Extraction force	> 27 Nm
Approach speed	max. 0,5 m/s
Dimensions (L x W x H)	170 x 42.5 x 51 mm
Mounting	4 x M5
Cable entry point	3 x M20 x 1,5
<b>General data</b>	
Ambient temperature	-25 - +70 °C
Wire ranges push-in terminals	1 x 0.5 -1.5 mm <sup>2</sup>
Protection degree according to EN 60529	IP 67
Weight	0,35 kg
Standards	EN 60947-1, EN 60947-5-1, EN ISO 13849-1, EN 62061
Approvals	DEGUV, c-CSA-us, CCC
