

P1000 Industrial Fan and Pump Drive

240V Class: ¾ to 175 HP

480V Class: 1 to 1000 HP

600V Class: 2 to 250 HP

The P1000 is the next generation in Industrial Fan and Pump control, designed specifically for variable torque applications. Simple to use, intuitive, and user friendly are key features in the P1000 design. The P1000 supports a wide range of network and control options providing for the most flexible and cost-effective solution.

LCD Operator with Real Time Clock

5-line, 16-character alpha-numeric display with time and date stamping for events, along with timer controls for starting, stopping, and speed changes without the need for external controls.

Application Macros

Choose from pre-configured fan and pump setup macros to match the application for quick and easy set up.

Selectable and Custom Engineering Units

Allows for easy configuration of keypad display to match process and feedback devices such as PSI, GPM, Feet.

Underload Detection

Monitors load and will shut system down in the event of a fan belt or pump shaft breakdown.

Parameter Storage and Removable Terminal Board

Allows for easy replacement of control card without removing control wires, and stores all drive settings without the need for a copy device.

PI Process Control

Maintains a set point for closed loop control of fans and pumps for pressure, flow, or temperature regulation, and eliminates the need for a closed loop output signal from a process controller. Independent PI to control an external device in the system.

Power Quality

Built-in DC reactors (30 HP and larger) provide input harmonics benefit, and protection from input disturbances. Integrated 12 Pulse version (480V, 40 HP and larger) provides a cost-effective solution for low harmonics.

Dynamic Noise Control

Monitors the load at all times and reduces the output voltage automatically, reducing motor audible noise.

Networking Options

Industrial Communication

- Modbus RTU (built-in)
- DeviceNet
- EtherNet/IP
- Modbus TCP/IP
- PROFIBUS-DP
- PROFINET

Building Automation Networks (BAS)

- BACnet
- Lonworks
- Metasys (N2)
- Apogee (P1)

Note: All communication protocols are by option card mounted within drive.

Specifications

Overload Capacity
• 120% for 60 seconds

Output Frequency
• 0.01 to 400 Hz

Control Methods
• V/Hz Control

Enclosure Solutions
• Open Type / IP00
• NEMA Type 1 (kit required for some models)
• Flange Type (front = Open/IP00, back = NEMA Type 12)

Power Solutions
• Six Pulse (Standard)
240V: ¾ to 175 HP
480V: 1 to 1000 HP
600V: 2 to 250 HP
• Twelve Pulse (Low Harmonic)
480V: 40 to 1000 HP

Ambient Operating Temperature
• -10°C to 40°C (14°F to 104°F)

Global Certification
• UL, CSA, CE, RoHS, C-Tick

Standard I/O
• (8) multi-function digital inputs (24Vdc)
• (3) multi-function analog inputs (0-10Vdc, 4-20 mA)
• (1) multi-function pulse input
• (1) fault relay output (form C)
• (1) multi-function relay (form C)
• (2) multi-function relay outputs (form A)
• (2) multi-function analog outputs (0 +/- 10Vdc, 4-20 mA)
• Sensor feedback power supply (+24Vdc @ 150 mA supply)
• 120V converter for 8 standard digital inputs (option)

P1000 Industrial Fan and Pump Drive

240V Class: 3/4 to 175 HP
 480V Class: 1 to 1000 HP
 600V Class: 2 to 250 HP

200-240V / 3-Phase
